When Should I Do While I Wait For My COVID -19 Test Results?

If you are testing for COVID-19, **you should go home and quarantine until you receive your test results.** The reason for this would be, if you come back with a positive result, you do not want to have additional contact with individuals while waiting for your result. This could further spread the disease. We all need to do our part to ensure we are slowing the spread of this virus. As always, if you have questions, you can contact public health.
