**Older adults and people of any age with underlying medical conditions are at higher risk for severe illness from COVID-19. The good news is that there are steps you can take to protect yourself and your loved ones:**

**Step 1. Keep germs away** • Wash your hands often. • Stay home unless you need food, medicine, or medical care. • If you need to go out, stay at least 6 feet—or two arm lengths—apart from others. • Avoid people who are sick. And remember, wear a cloth face covering when around others.

**Step 2. Make a plan.** • Identify and talk with someone who can help care for you if you get sick. • Have supplies, such as medicines and groceries on hand, or find ways to have them brought to you.

**Step 3. Keep up with the situation and health recommendations in your area.** • If COVID-19 is spreading in your community, stay home as much as possible and avoid crowds. **If you do get sick with fever, cough, or shortness of breath, call your doctor right away.**

**Stay Safe and Be Well**
