It is very important that if you make an appointment, you are able to keep it. Please remember that when scheduling.

COVID-19 Vaccine Facts:

The vaccines may cause side effects in some people, like sore muscles, feeling tired, or mild fever. These reactions mean the vaccine is working to help teach your body how to fight COVID-19 if you are exposed. For most people, these side effects will last no longer than a day or two.

If you have questions, you may contact:
