Deaths of Community Members	3 (none recent)
Vaccines Given	2540
Fully vaccinated	1199
Partially vaccinated	179

COVID News

Boosters

- Boosters will begin with ages 65+ and will follow with those that are at greater risk and immunocompromised. Those with high-risk occupations and exposure will also be given boosters.
- Will begin the week of the 15th.
- Recipients of Moderna or Pfizer as their primary series (1st 2 shots) must wait 6 months after the 2nd shot to get the booster. Johnson and Johnson have a 2 month wait.
- Dates and booster eligibility will be posted soon. We will continue to update the community.
- We will not have Johnson and Johnson booster because we will have to waste vaccine if we order. Not enough need. Vaccine for boosters can be mixed, any primary series can have any of the other vaccines as their booster. We have moderna and Pfizer.

Pediatric Vaccinations

- ✓ Pediatric vaccinations have arrived, and we will tentatively begin to vaccinate the week of Nov. 15th also.
- ✓ Pfizer is the only manufacturer approved for pediatrics (Ages 5 to 17). There will be no boosters for kids.
- ✓ CDC is looking to have vaccine approved for the 6 months to 4 yr. old group this spring.

COVID rates are high in the entire state, and we are doing a lot of testing. Everyone should always wear a mask, in public areas and gatherings. Please protect yourself, your family, and the community.
