Wisconsin Immunization Registry (WIR)

What is WIR?

The Wisconsin Immunization Registry, also called WIR, is an internet database that tracks vaccine records for Wisconsin children and adults.

WIR and similar systems are important tools to make sure that children and adults receive vaccines on time and reduce the time and money it takes to find old vaccine records.

WIR parent or legal guardian brochure

English - [WIR - Parent brochure, P-42154](#) (PDF)
