Clean Water Act, Section 401 Certification – Health and Wellness Center Boring Holes

The ACOE is reviewing the Health and Wellness Center Boring Hole Project for an individual permit.

Project Summary

The Health and Wellness Center would like to conduct seven boring hole digs to survey land to see if there is buildable land around the current Health and Wellness Center. This project will be conducted to make sure that the land around the center is buildable and will be able to expand the current building. These seven holes will be on the west and the north sides of the building. Once the boring is completed the holes will be backfilled and the layers will be put back in place as they were taken out.

In accordance with Section 401 of the Clean Water Act (CWA), the Bad River Band of Lake Superior Tribe of Chippewa Indians is evaluating the submitted materials to determine if there is reasonable assurance—with conditions attached—that the activities associated with the Army Corps of Engineers’ authorizations will be consistent with relevant water quality considerations.

The Tribe seeks comments on its proposed CWA Section 401 Certification of the Army Corps’ authorization for this project. All comments are considered during the project review. Additional information may be obtained by contacting the Water Regulatory Specialist at (715) 979-1370 or WaterReg@badriver-nsn.gov. Written comments may be emailed or sent by US Mail to:
