

Hello,

We reviewed the recent RFP posted for Design for New Youth Facility Project and have a quick question. If known, when is this project expected to go to bid for contractors and what is the expected start date for construction?

Thank you for your assistance.

Our current timeline aspiration is that the project will go to bid for contractors within the next several months. Permitting work for the site is underway. Site preparation to begin by Q3 2026. Vertical construction to start in Q2 2027.
